

Mellow - Allermuir

Mellow is a contemporary and youthful restaurant or meeting chair, complemented by matching high stool.

Its simple construction is based upon clean, crisp, rounded or alternatively square, upholstered shapes, upon a compact Steel tube frame. The geometric shapes make it fun, funky and youthful in strong modern colours, or cool and sophisticated in Chrome and subtle shades.

Product Specification

Design: 'Mellow'

Designer: Ton Haas

Dutch designer Ton Haas is well known internationally throughout the furniture industry. He studied both in the Netherlands and the UK, graduating from Kingston Polytechnic in 1979, before completing a postgraduate diploma in Arnhem and much later, a Masters course at Rotterdam's school of Architecture. After belonging to a number of partnerships he set up on his own in 1993. Ton has lectured widely, been appointed to numerous design bodies and judging juries, won several design awards and had his work displayed in the collections of museums of modern art and design.

Features:

Mellow is a contemporary and youthful, restaurant or meeting chair, complimented by matching bar stools. It is a design with a distinctly broader European flavour, adding to the increasingly international appeal of our products. Its simple construction is based upon clean, crisp, upholstered shapes upon a compact steel tube frame. Superb ergonomics are generated by the well-proportioned seat and backrest with relaxing backward movement provided by a flexible steel strap. It is this uncomplicated style that allows Mellow to fit into so many different environments.

Finishes:

All chair, stool and steel table framework, including back straps, can be either Epoxy Polyester Powder Coated (EPPC), or bright or satin chrome plated from our range of metal finishes. Upholstered seats and backs can be made from a wide choice of contract quality fabrics including customer's own material.

Marketplace:

The Mellow series of chairs and stools is versatile in both function and use, from restaurants to conference rooms. The clean, crisp, geometric shapes make it fun, 'funky' and youthful in strong modern colours or cool and sophisticated in satin chrome and subtle shades. Although not one for the traditional interior scheme, it lends itself perfectly to both modern and classical interior architecture and has a clearly international feel.
