

# Sense™

## Elevator speech

Sense is designed for simplicity. Quick and easy construction, unparalleled flexibility and a wealth of intelligently designed products and accessories makes Sense the most versatile of office furniture systems.

Designed by Daniel Korb, of Korb & Korb, Sense won the prestigious Red Dot Award in 2008 for product design.

## Key messages

### Design to Connect

- Intelligent design - simple mono beam structure allows Sense to be easily specified and configured.
- Simple choices - with a range of leg styles, storage options and accessories.
- A working solution - personalise Sense to your preferred working style.

### Design to Build

- No tools - with a unique plug + play system, Sense can be built effortlessly.
- Intuitive - components simply lock, click or snap into place, reducing downtime, and increasing productivity.
- Flexible - adjust and adapt your workspace as your needs evolve.

### Design to Play

- Play - craft fun, fresh environments with vibrant colour choices and cool finishes.
- Create a look - personalise and change Sense to reflect your identity.
- Build - design a better world you, by creating effective spaces.

### Design to Grow

- Scale - start with a single table and work up, respond as needs demand.
- Future proof - add new tables, change layouts, take down or rebuild, good design is built to last.
- Considered – our heritage and sustainable design principles create a best in class product.

## Why

- Need for simple, high-performance table system to compete in this market sector.
- Product that would complement Abak Environments.
- Different customer requirements; AE = flexibility, Sense =simplicity.

## Vocabulary

- Wide range of work surface shapes and sizes - rectangular, wave, 120°, 90° corner.
- Extensions, returns, satellites, meeting ends.
- Choice of leg styles.
- Privacy screens and toolbars.
- Cable management products.
- Accessories: paper trays, pinboards, CPU holder, shelves, and drawers.
